

Master Bill of Lading (MBL)

User Story

As an Ocean Export operator, I want to create, view, and validate MBL records so that carrier-level shipment documents are complete, traceable, and ready for carrier submission.

Form Sections

1. Vessel & Routing
2. Freight & Service
3. Container & Item Summary

DOMESTIC ROUTING / EXPORT INSTRUCTIONS

Submit empty MBL form to capture required-field error state.

Acceptance Criteria

1. User can navigate to the list and open the create form without a UI error or blank screen.
2. All form sections (Identification, Vessel & Routing, Freight & Service, Container & Item Summary) are rendered and scrollable.
3. Submitting the form with empty required fields shows inline error messages without a page reload.
4. A valid record can be saved and the system redirects to the detail/list view with the new record visible.
5. All dropdown (select) options match the values defined in the application constants.

6. Date fields only accept valid date input (ISO YYYY-MM-DD) and do not accept free-form text.

Validation Rules

- 1. **MB/L No.*** (`name="mbl_no"`) must not be empty; form must block submission and highlight the field with an error message.
- 2. **Office*** (`name="office"`) must not be empty; form must block submission and highlight the field with an error message.

Field Semantics

Label	Tag	Name	Type	Required	Business Meaning
MB/L No.*	input	mbl_no	text	No	The carrier official shipment reference number as appears on Master Bill Lading. Must match the booking confirmation issued by the shipping line.
Office*	input	office	text	No	The Soleil branch office responsible for filing and managing the shipment.
